Monthly posture summary — 2026-09

Endpoint compliance overview for Acme (sample data)

Prepared by MigAAP — sample · data as of 23 Oct 2026 03:13 UTC · generated 23 Oct 2026 03:13 UTC

Headline

Overall posture score	28.7%
Score at start of month	—
Devices (de-duplicated)	5
Not seen for 30+ days	1
Unmanaged	0
In more than one management tool	0
Below the configured minimum OS	0
Changes detected (drift)	4

Weakest controls

Control	Applicable	Compliant	Configured	Not configured	Score
Password complexity	5	0	0	5	0%
Update policy	5	0	0	5	0%
Application allowlist	5	0	0	5	0%
VPN profiles	5	0	0	5	0%
Remote lock and wipe capability	5	0	0	5	0%
Browser restrictions	5	0	0	5	0%
Certificate profiles	5	0	0	5	0%
Enrollment restrictions	5	0	0	5	0%

Changes this month

Change	Count
control changed	2
device added	1
policy changed	1

Effective-usage findings

Finding	Count
stale device	1
unused feature	4

Data freshness

Tool	Type	Status	Last successful sync
DemoMDM	demo	healthy	2026-10-23T03:13:08+00:00

Compliant/non-compliant counts come from device state the tools report (for example encryption or anti-malware health) or from OS versions checked against the configured minimum. 'Configured' means a managing tool has a readable policy for the control on that platform; policy assignment to each device is not read yet, so it is not proof that every device received it. 'Unknown' (tool policies not readable) is excluded from scores and never assumed.
